name: **Hide**
Requiers: [[training:1], [type:at gun]]
Cost: Upgrade all models for: 8xp

While hidden you cannot be fired upon or be assaulted, nor can you fire or assault. You are also immune to Fear and Terror
While hidden replace the unit with a hidden token. If you have multiple hidden units you do not have to reveal which one is under which token (but you have to keep track your self). In the start of the game you do not have to show the enemy exactly what units you have hidden. (but you have to state how many victory points worth of units that are hidden)
You stay hidden until you reveal your self, have a speed slow in a clear hex with line of sight to an enemy, in aftermath phase if an enemy is within point blank range, or an enemy special action reveals your location
If you reveal your self you get reveal bonuses: +2 to hit, +1 to damage of ranged weapons and pluss 50 percent assault strength and deflection.
In addition to revealing your self as a movement order, you may reveal your self any time you share an hex with an enemy. If so, make an assault and gain the stated reveal bonuses

3.2 Illusion

Name	Illusion
Size	medium
Cost	2cp
Models	4 x Illusion
Armor	0
Shaken	
Special:	

When fired at, you may pretend to look at normal infantry damage table unless the damage is 4 or above, for which the illusion is given away and is removed from play.
Further, if the illusion is matched with one real infantry base, it may mimic the orders of that infantry, and may follow it whereever the infantry goes.
The illusion have the exact same modifiers and abilities with regard to being hit as the infantry it is mimicing. Thus, the illusion has Take Cover[still][-2], Take Cover[still][-3], and camufloulage[forrest][-1] as appropritate
Thus the enemy do not know which are illusions and which are real. However if, for any reason, the enemy gets information which gives the illusion away, the illusion is not removed from play, but must be identified by an illusion marker. For example if the illusion was fired at by something which does psychic damage, it would require you to tell the enemy that this unit does not have a psychic damage table, which would give the illusion away.
If the illusion is not in a hex with a friendly infantry, it has only chase order available

template.ability.reroll assault:3

Not Yet dead: after this model in the unit base is killed, this model is not yet dead after all. This model becomes a new unit base and becomes an Champion with the same equipment as this model and orders available as the unit base this model is attached to . Champion does not retain any of the abilities from the unit base or the model, and has a seperate model and unit base entry. See Champion. In the case this model is not the last model to be eliminated, it may be the case that you get an extra unit base in the hex. If this causes overcrowding (more than 2 units in a hex), the champion may spawn in one of the neighborhing hex which is furthest from an enemy unit

Unit base gets the option to fire ONE of this weapon instead of regular weapons.
If one unit of size large or smaller is hit by this weapon but not killed, ignore the first step of the units next movement order (movement phase 1) and replace it with a special movement instead. Carry out the second and third part of the movement order as normal. Move the target one hex towards you while keeping the orientation of the unit. If there are multiple hexes which you can move the target to, you may choose where to move the enemy. However you cannot choose to move the unit into an impassable hex, or overcrowded hex. If this is not possible, the unit is shaken instead of moved. If this movement forces the target to move into a hex occupied by you, carry out an assault.
